

recollection

Beta tool for building interfaces
to digital collections

Maps!

Facets!

Tag Clouds!

(find out more about your data)

background

Recollection was initially developed as a tool to help **NDIIPP partners** develop common interfaces to the distributed collection of born digital materials. The project is now in the process of **becoming more broadly available**. Recollection is based on the tools that came out of the **Simile** project.

<input checked="" type="checkbox"/>	<input type="radio"/>	national domain	yes

Create a View

The dialog shows six view options with small preview thumbnails:

- List: A list view with columns and rows.
- Map: A geographical map showing data points.
- Scatter Plot: A scatter plot with blue data points.
- Table: A table view with colored rows.
- Timeline: A horizontal timeline with a blue bar.
- Pie Chart: A multi-colored pie chart.

publish & embed views

Copy the following and paste it into your page where you'd like your data view to be placed.

```
<script id="freemix-embed" src="http://recollection.zepheira.com/views/abpo/iipc-web-ar
```
